

Nordic-to-Asian VALUE CHAIN

<https://datarespons.solutions>

Data Respons Solutions offers the benefit of a comprehensive Nordic-to-Asia value chain, covering all phases of the development and production of embedded solutions.

World Class production

We have established long-term strategic technology partnerships in Asia. The Asian partnership model has been developed over a period of ten years and an important milestone was reached in 2007 when Data Respons opened an office in Taiwan. Data Respons Solutions' Taiwan office is responsible for logistics, project management, quality assurance and sourcing and works daily with our offices in Europe as well as with our Asian partners. Progress on time-critical processes at our Asian partner is monitored by our Taipei office on an hour-by-hour basis to ensure that no issue occurs that would affect our delivery performance. International freight providers are used to combine and optimise transportation either by air or sea.

Speed, Quality, Cost & Innovation

A key success factor for Data Respons Solutions is that we can deliver the benefits of faster development and production time, reduced cost and access to the latest technology. Our local innovation and world-class production is the major benefit for our customers. Data Respons Solutions becomes a stepping stone into Asia for our customers, where our presence ensures an optimal synthesis of local innovation, global production and cost effective logistics.

Your Complete Technology Network

Nordic-to-Asian Value Chain

Long-Term Technology Partners

YOUR BENEFITS AT A GLANCE

Dedicated Network of Leading OEM
Technology Partners

Access to state-of-the-art
Embedded Technologies

Short Development & Production Times

Individual Customisation

EU-Quality Standards

Projektmanagement

Optimal Cost/Benefit Ratio

SPEED

Local presence and strategic partnerships reduce the overall time-to-market.

INNOVATION

Access to the primary area for embedded technology in the world, highly skilled expertise and working with different industries drives our innovation.

QUALITY

High-level project management and quality assurance measures, tried-and-tested industrial computer products and the expertise our customers need ensures top quality.

COST IMPROVEMENTS

Close and long-term relationships with our customers, partners and Nordic Operations Centre ensure cost savings and an Asian high-volume production set-up provides a better cost-benefit ratio.
